Revenues

Consolidated revenues of \$469.8 million increased \$52.3 million, or 12.5%, in the fourth quarter of 2020 compared to the fourth quarter of 2019 primarily due to strong comparable sales results for North America restaurants, including 10.2% for company-owned restaurants and 14.5% for franchised restaurants, resulting in higher company-owned restaurant revenues, franchise royalties and commissary sales. International revenues also increased primarily due to higher commissary revenues and higher royalties from strong comparable sales results of 21.4% for the quarter.

Operating Results

Consolidated operating income of \$19.7 million for the fourth quarter of 2020 increased \$19.8 million compared to the fourth quarter of 2019. Excluding the impact of Special items, consolidated operating income increased \$28.7 million for the three months ended December 27, 2020. See “Reconciliation of Non-GAAP Financial Measures,” for additional information. The increase, excluding Special items, was primarily due to temporary franchise support of \$25.4 million in the fourth quarter of 2019 (see “Temporary Franchise Support” below) and higher income from higher comparable sales both domestically and internationally.

Diluted earnings per share was \$0.28 for the fourth quarter of 2020 representing an increase of \$0.46 over the fourth quarter of 2019. Excluding Special items, diluted earnings per share was \$0.40 representing an increase of \$0.65 over the fourth quarter of 2019. Diluted earnings per share was reduced by approximately \$0.01 per diluted share in the fourth quarter of 2020 (\$0.03 impact when excluding Special items) due to income attributable to participating securities, including our Series B Convertible Preferred Stock (the “Series B Preferred Stock”), based on the allocation of undistributed earnings to participating securities in the period. See “Participating Securities Earnings Per Share” for additional information related to the calculation of income attributable to participating securities for the three months ended December 27, 2020.

Consolidated operating income of \$19.7 million for the fourth quarter of 2020 increased \$19.8 million from the fourth quarter of 2019. Excluding the impact of Special items, the increase was \$28.7 million. Significant changes in operating income and operating income, excluding Special items, are as follows:

- Domestic Company-owned restaurants operating income was \$3.2 million for the fourth quarter of 2020, a decrease of \$6.4 million. The higher profits from comparable sales of 10.2% were offset by labor initiatives, bonuses, including the previously announced special end-of-year bonus for front-line team members, and increased commodities costs. Additionally, the prior period benefited from the expiration of customer rewards associated with our Papa Rewards loyalty program (\$2.6 million benefit for the fourth quarter of 2019).
- North America franchising increased \$10.3 million to \$26.9 million primarily due to higher comparable sales of 14.5% and a higher effective royalty rate due to the completion of our franchise assistance program in the third quarter of 2020 (see “Temporary Franchise Support” for additional information).
- North America commissaries was relatively flat as higher profits from higher volumes were substantially offset by higher bonuses, including the bonus for front-line team members previously mentioned.
- International increased \$3.1 million to \$7.2 million primarily due to higher profits from higher comparable sales of 21.4% and higher PJUK commissary income attributable to higher comparable sales and increased units.
- All others, which primarily includes our online and mobile ordering business, our wholly owned print and promotions subsidiary and our North America marketing funds, increased \$1.8 million primarily due to higher online revenues.
- Unallocated corporate expenses decreased approximately \$20.0 million primarily due to lower discretionary marketing fund investments (see “Temporary Franchise Support” for additional information).

Full Year Results

Consolidated revenues increased 12.0% to \$1,813.2 million for the year ended December 27, 2020, compared to the prior year comparable period, primarily due to higher comparable sales which benefited each of the company's operating segments. Consolidated operating income increased \$65.7 million for the year ended December 27, 2020 (\$62.2 million excluding Special items), compared to the prior year comparable period, primarily due to improved results from North America franchising and Domestic Company-owned restaurants and lower temporary franchise support.

Excluding Special items, diluted earnings per share was \$1.40 representing an increase of \$1.37 over the prior year period. Diluted earnings per share was reduced by approximately \$0.07 per share for the year (\$0.09 impact when excluding Special items) due to income attributable to participating securities, including Series B Preferred Stockholders, based on the allocation of undistributed earnings to participating securities in the period. See "Participating Securities Earnings Per Share" for additional information related to the calculation of income attributable to participating securities for the year ended December 27, 2020.

The company's cash flow from operating activities for the year ended December 27, 2020 was \$186.4 million, compared to \$61.7 million a year ago, reflecting higher net income and favorable working capital changes, including timing of payments. See "Free Cash Flow" for additional information.

Of the company's 2,111 international franchised stores, approximately 65 stores were temporarily closed as of December 27, 2020, principally in Latin America and Europe, in accordance with government policies. In North America,

almost all traditional restaurants remain open and fully operational. A number of non-traditional restaurants located in universities and stadiums are temporarily closed; these non-traditional locations are not significant to our revenues and operating results.

Our development pipeline as of December 27, 2020 included approximately 1,460 restaurants (210 units in North America and 1,250 units internationally), the majority of which are scheduled to open over the next six years.

Strategic Corporate Reorganization for Long-term Growth

On September 17, 2020, we announced plans to open an office in Atlanta, Georgia. The Atlanta office is part of a broader strategic reorganization of corporate functions reflecting the company's ongoing transformation into a brand and culture that can effectively and efficiently deliver on the company's purpose, values and strategic business priorities. The opening of the Atlanta location and related organizational changes are expected to be completed by the summer of 2021. Affected employees who do not relocate to Atlanta have been offered a separation package. We expect to incur certain one-time corporate reorganization costs of approximately \$15 to \$20 million related to employee severance and transition, recruitment and relocation, and third-party and other costs through 2021, and \$6.0 million (or approximately \$0.12 per diluted share) of these strategic corporate reorganization costs were incurred in the fourth quarter of 2020. See "Reconciliation of Non-GAAP Financial Measures" for additional information.

2021 Outlook

Given on-going uncertainty surrounding the future impact of COVID-19, we are not providing outlook for 2021 at this time.

Supplemental Information and Financial Statements

Definition

Comparable sales: We believe North America, international and global restaurant and comparable sales growth information is useful in analyzing our results since our franchisees pay royalties and marketing fund contributions that are based on a percentage of franchise sales. Franchise sales also generate commissary revenue in the United States and in certain international markets. Franchise restaurant and comparable sales growth information is also useful for comparison to industry trends and evaluating the strength of our brand. Management believes the presentation of franchise restaurant sales growth, excluding the impact of foreign currency, provides investors with useful information regarding underlying sales trends and the impact of new unit growth without being impacted by swings in the external factor of foreign currency. Franchise restaurant sales are not included in the company's revenues.

Reconciliation of Non-GAAP Financial Measures

Effective as of the first quarter of 2020, the company modified its presentation of adjusted (non-GAAP) financial results to no longer present certain financial assistance provided to the North America system in the form of royalty relief and discretionary marketing fund investments as Special charges. This financial assistance, which began in the third quarter of 2018 in response to declining sales in North America, concluded in the third quarter of 2020. The adjusted financial results for the three months and full year ended December 27, 2019 have been revised to remove these items. See "Temporary Franchise Support" for additional information regarding this change in presentation.

The table below reconciles our GAAP financial results to our adjusted financial results, which are non-GAAP measures. The non-GAAP adjusted results shown below and within this press release, which exclude the items in the table below (collectively defined as “Special items”), should not be construed as a substitute for or a better indicator of the company’s performance than the company’s GAAP results. Management believes presenting certain financial information excluding the Special items is important for purposes of comparison to current year results. In addition, management uses these metrics to evaluate the company’s underlying operating performance and to analyze trends.

Temporary Franchise Support

Beginning in the third quarter of 2018, the company began providing various forms of support and financial assistance to the North America franchise system in response to declining North America sales. In July 2019, the company announced a formal relief program to provide our North America franchisees with certainty regarding the availability and schedule of the temporary relief which concluded in the third quarter of 2020.

As previously mentioned, effective as of the first quarter of 2020, the company no longer presents certain royalty relief and discretionary marketing fund investments, included herein as “Temporary Franchise Support,” as Special items within its adjusted financial results. The prior period adjusted financial measures presented above in “Reconciliation of non-GAAP Financial Measures” have also been revised to remove the impact of these items. The Temporary Franchise Support concluded in the third quarter of 2020.

Temporary Franchise Support investments were \$29.3 million (or approximately \$0.69 per diluted share) for the full year ended December 27, 2020 (none for the three-month period), compared to \$25.4 million (or approximately \$0.62 per diluted share) and \$46.6 million (or approximately \$1.14 per diluted share) for the three and twelve months ended December 29, 2019, respectively, as follows (in thousands):

- (a) Represents financial assistance provided to the North America system in the form of temporary royalty reductions that are above and beyond the level of franchise assistance the company would incur in the ordinary course of its business. These royalty reductions are not an expense, but rather consist of the amount of waived royalties that the company would otherwise have been entitled to absent the waiver. The waived royalties are not included in North America franchise royalties and fees revenues.
- (b) Represents incremental discretionary marketing fund investments in excess of contractual company-owned restaurant-level contributions, which were made as part of our previously announced temporary financial support package to our franchisees. The marketing fund investments are included in Unallocated corporate expenses.

Free Cash Flow

We define free cash flow as net cash provided by operating activities (from the Consolidated Statements of Cash Flows) less the purchases of property and equipment and dividends paid to preferred shareholders. We view free cash flow as an important measure because it is one factor that management uses in determining the amount of cash available for discretionary investment. Free cash flow is not a term defined by GAAP, and as a result, our measure of free cash flow might not be comparable to similarly titled measures used by other companies. Free cash flow should not be construed as a substitute for or a better indicator of the company's performance than the company's GAAP measures. The company's free cash flow for the years ended December 27, 2020 and December 29, 2019, respectively were as follows (in thousands):

	Year Ended	
	Dec. 27, 2020	Dec. 29, 2019

Participating Securities Earnings Per Share

We compute earnings per common share using the two-class method, by which net income attributable to participating securities, in addition to preferred stock dividends and accretion, is deducted from net income attributable to the company to determine net income attributable to common shareholders. Net income attributable to participating securities is the portion of undistributed earnings, defined as net income attributable to the company, less dividends paid to common and preferred shareholders, that would be allocated to the holders of participating securities on an as-converted basis.

The calculation to determine the amount of undistributed earnings to allocate to participating securities is as follow (in thousands):
