Adjusted diluted earnings per share (a)	0.93	0.48	0.45	1.94	0.65	1.29

(a) Adjusted diluted earnings per share is a non-GAAP measure that excludes “Special items,” which impact comparability. Special items of \$112.4 million and \$115.4 million for the three and six months ended June 27, 2021 include \$109.9 million of a one-time charge in each period associated with the repurchase and conversion of all shares of the company’s Series B Convertible Preferred Stock (“Series B Preferred Stock”) and \$3.3 million and \$7.2 million for the three and six month ended June 27, 2021, respectively, of strategic corporate reorganization costs associated with the company’s new office in Atlanta, Georgia projected to open in the fall of 2021. The reconciliation of GAAP to non-GAAP financial results is included in “Reconciliation of Non-GAAP Financial Measures” below.

### *Revenues*

Consolidated revenues of \$515.0 million increased \$54.4 million, or 11.8%, in the second quarter of 2021 compared to the second quarter of 2020 primarily as a result of higher comparable sales of 5.2% for North America restaurants, which benefited from continued menu, delivery and digital innovation as reflected in higher company-owned restaurant revenues, franchise royalties and commissary sales. Higher commodity costs also positively impacted commissary sales. International revenues also increased primarily due to higher royalties from strong comparable sales results of 21.2% for the quarter and higher unit counts.

### *Operating Results*

Consolidated operating income of \$44.6 million for the second quarter of 2021 increased \$14.1 million compared to the second quarter of 2020. The increase primarily reflects strong sales on higher comparable sales and year-over-year unit growth domestically and internationally. Additionally, the second quarter of 2021 benefited from a higher effective royalty rate and additional franchise royalties of \$5.1 million compared to the comparable period in 2020 primarily as a result of ending in the third quarter of 2020 our temporary franchise support program.

Diluted loss per share was \$2.30 for the second quarter of 2021 representing a decrease of

\$2.78 over the second quarter of 2020. Diluted loss per share included \$3.15 per diluted share in the second quarter of 2021 from a reduction in net income attributable to common shareholders related to the repurchase and conversion of all shares of Series B Preferred Stock. This charge reflects the excess of the one-time cash payment over the carrying value of the Series B Preferred Stock. Excluding the impact of Special items, adjusted diluted earnings per share was \$0.93 representing an increase of \$0.45 over the second quarter of 2020.

## **Free Cash Flow**

The company's free cash flow (a non-GAAP financial measure defined as net cash provided by operating activities, less purchases of property and equipment and dividends paid to preferred shareholders) for the six months ended 2021 and 2020, respectively, was as follows (in thousands):

	<b>Six Months Ended</b>	
	<b>June 27, 2021</b>	<b>June 28, 2020</b>

(1) This does not include the cash consideration paid for the repurchase and conversion of the Series B Preferred Stock. See "Repurchase and Conversion of Series B Preferred Stock" below for additional information.

We view free cash flow as an important financial measure because it is one factor that management uses in determining the amount of cash available for discretionary investment. Free cash flow is not a term defined by GAAP, and as a result, our measure of free cash flow might not be comparable to similarly titled measures used by other companies. Free cash flow should not be construed as a substitute for or a better indicator of the company's performance than the company's GAAP measures.

See the Management's Discussion and Analysis of Financial Condition and Results of Operations section of our Quarterly Report on Form 10-Q filed with the SEC for additional information concerning our operating results for the three and six months and cash flow for the six months ended June 27, 2021.

## **Repurchase and Conversion of Series B Preferred Stock**

On May 13, 2021, the company completed the previously announced repurchase and conversion to common stock of all of the shares of Series B Preferred Stock owned by affiliates of Starboard Value LP. Additionally, on June 7, 2021, all of the remaining outstanding shares of the Series B Preferred Stock, owned by certain franchisee investors, were repurchased or converted to common stock. Collectively, these actions were taken in return for cash payments of \$188.6 million. The company also recorded a reduction to net income attributable to common shareholders of \$109.9 million as a result of the transaction. This one-time charge to equity reflects the excess of the cash payments over the carrying value of the respective Series B Preferred Stock. Following these transactions, there was no Series B Preferred Stock outstanding as of the end of the quarter.

## **Cash Dividend**

The company paid common and preferred stock dividends of \$10.4 million in the second quarter of 2021. On August 3, 2021, our Board of Directors approved a 55.6% increase in

the company's dividend rate per common share, from \$0.90 on an annual basis to \$1.40 on an annual basis, and subsequently declared a third quarter dividend of \$0.35 per common share, of which approximately \$12.8 million will be paid to common stockholders. The common share dividend will be paid on August 27, 2021 to stockholders of record as of the close of business on August 16, 2021. The declaration and payment of any future dividends will be at the discretion of our Board of Directors.

## Supplemental Information and Financial Statements

### Definition

“Comparable sales” represents the change in year-over-year sales for the same base of restaurants for the same fiscal periods. “Global system-wide restaurant sales” represents total restaurant sales for all company-owned and franchised stores open during the comparable periods, and “Global system-wide restaurant sales growth” represents the change in such sales year-over-year. We believe North America, international and global restaurant and comparable sales growth and Global system-wide restaurant sales information is useful in analyzing our results since our franchisees pay royalties and marketing fund contributions that are based on a percentage of franchise sales. Comparable sales and Global system-wide restaurant sales results for restaurants operating outside of the United States are reported on a constant dollar basis, which excludes the impact of foreign currency translation. Franchise sales also generate commissary revenue in the United States and in certain international markets. Franchise restaurant and comparable sales growth information is also useful for comparison to industry trends and evaluating the strength of our brand. Management believes the presentation of franchise restaurant sales growth, excluding the impact of foreign currency, provides investors with useful information regarding underlying sales trends and the impact of new unit growth without being impacted by swings in the external factor of foreign currency. Franchise restaurant sales are not included in the company’s revenues.

### Reconciliation of Non-GAAP Financial Measures

The table below reconciles our GAAP financial results to our adjusted financial results, which are non-GAAP measures. The non-GAAP adjusted results shown below and within this press release, which exclude the items in the table below (collectively defined as “Special items”), should not be construed as a substitute for or a better indicator of the company’s performance than the company’s GAAP results. Management believes presenting certain financial information excluding the Special items is important for purposes of comparison to current year results. In addition, management uses these metrics to evaluate the company’s underlying operating performance and to analyze trends.
