Comparable sales in North America and internationally grew 6.9% and 8.3%, respectively, on top of last year’s tremendous results, as our innovation strategy continues to attract new customers and engage our loyal ones, while also driving sustainable ticket growth,” said President & CEO Rob Lynch. “Escalating interest and excitement among new and existing franchisees continues to accelerate unit growth and led to signing our largest international and domestic development deals ever last quarter.”

Mr. Lynch continued, “We also are delivering on our commitment to optimize our capital structure and allocation priorities to support long-term value creation and growth. Last quarter we strategically refinanced our debt and this morning announced a new \$425 million share repurchase program. Adjusted diluted earnings per share (a)	0.83	0.35	0.48	2.76	0.99	1.77

(a) Adjusted diluted earnings per share is a non-GAAP measure that excludes “Special items,” which impact comparability. Special items include strategic corporate reorganization costs associated with the company’s new office in Atlanta, Georgia of \$2.2 million and \$9.4 million for the three and nine months ended September 26, 2021, respectively. For the nine months ended September 26, 2021, Special items also include \$109.9 million of one-time charges associated with the repurchase and conversion of all shares of the company’s Series B Convertible Preferred Stock (“Series B Preferred Stock”) during the second quarter. The reconciliation of GAAP to non-GAAP financial results is included in “Reconciliation of Non-GAAP Financial Measures” below.

Revenues

Consolidated revenues of \$512.8 million increased \$39.8 million, or 8.4%, in the third quarter of 2021 compared to the prior year primarily as a result of higher comparable sales of 6.9% for North America restaurants, which benefited from continued execution of our innovation strategies and customer retention as reflected in higher company-owned restaurant revenues, franchise royalties and commissary sales. International revenues also increased primarily due to higher royalties from strong comparable sales results of 8.3% for the quarter and higher unit counts.

Operating Results

Consolidated operating income of \$38.6 million for the third quarter of 2021 increased \$14.0 million compared to the third quarter of 2020. The increase reflects strong consolidated revenue on higher comparable sales and year-over-year unit growth domestically and internationally. Additionally, temporary franchise support of \$13.5 million (\$10.0 million of discretionary marketing fund investments and \$3.5 million of royalty relief) was provided in the prior year comparable period as part of our franchise assistance program, which was non-recurring and concluded in the third quarter of 2020. These benefits more than offset higher costs associated with labor shortages and commodity inflation experienced within our domestic company-owned restaurants and supply chain.

The effective income tax rate was 11.7% for the third quarter of 2021 representing a decrease of 9.9% from the prior year period. The decrease in the effective rate was primarily due to the finalization of our 2020 federal income tax return, which resulted in a \$2.7 million

benefit to tax expense, including immaterial prior year true-up adjustments. Diluted earnings per share was \$0.79 for the third quarter of 2021 representing an increase of \$0.44 over the third quarter of 2020. Excluding the impact of Special items, adjusted diluted earnings per share was \$0.83 representing an increase of \$0.48 over the third quarter of 2020.

	<u>Nine Months Ended</u>	
	<u>Sept. 26,</u>	<u>Sept. 27,</u>

We view free cash flow as an important financial measure because it is one factor that management uses in determining the amount of cash available for discretionary investment. Free cash flow is not a term defined by GAAP, and as a result, our measure of free cash flow might not be comparable to similarly titled measures used by other companies. Free cash flow should not be construed as a substitute for or a better indicator of the company's performance than the company's GAAP measures.

See the Management's Discussion and Analysis of Financial Condition and Results of Operations section of our Quarterly Report on Form 10-Q filed with the SEC for additional information concerning our operating results for the three and nine months and cash flow for the nine months ended September 26, 2021.

Senior Notes Offering and Refinancing of Revolving Credit Facility

On September 14, 2021, the company issued \$400.0 million of 3.875% senior notes which will mature on September 15, 2029. Concurrently with the closing of the offering, the company amended and restated its credit agreement, which provides for a senior secured revolving credit facility in an aggregate available principal amount of \$600.0 million. The revolving facility will mature on September 14, 2026. The company used borrowings under the amended credit agreement, together with the net proceeds from the offering of the senior notes, to repay outstanding revolver and term loan borrowings under the company's previously existing credit agreement.

Cash Dividend

The company paid cash dividends of \$12.8 million (\$0.35 per common share) in the third quarter of 2021. On October 28, 2021, our Board of Directors declared a fourth quarter dividend of \$0.35 per common share. The common share dividend will be paid on November 19, 2021 to stockholders of record as of the close of business on November 9, 2021. The declaration and payment of any future dividends will be at the discretion of our Board of Directors.

New \$425 million Share Repurchase Program

Subsequent to the end of the third quarter, on October 28, 2021, our Board of Directors approved a new share repurchase program for up to \$425.0 million of the company's common stock, which will be funded by our operating cash flows and increased liquidity following the senior notes offering and refinancing of our revolving credit facility, to further enhance shareholder returns as we also continue to invest in our long-term growth. This additional program represents approximately 9.4% of the company's currently outstanding common stock based on the closing stock price as of October 29, 2021. The new share repurchase program has an indefinite duration and will initially operate alongside the Company's existing \$75.0 million share repurchase authorization, which expires on December 26, 2021.

The timing and volume of share repurchases under the new share repurchase program may be executed at the discretion of management on an opportunistic basis, subject to market and business conditions, regulatory requirements and other factors, or pursuant to trading plans or other arrangements. Repurchases under the new program may be made through open market, block, and privately negotiated transactions, including Rule 10b5-1 plans, at times and in such amounts as management deems appropriate. Repurchases under the company's share repurchase program may be commenced or suspended from time to time at the company's discretion without prior notice.

Supplemental Information and Financial Statements

Definition

“Comparable sales” represents the change in year-over-year sales for the same base of restaurants for the same fiscal periods. “Global system-wide restaurant sales” represents total restaurant sales for all company-owned and franchised stores open during the comparable periods, and “Global system-wide restaurant sales growth” represents the change in such sales year-over-year. We believe North America, international and global restaurant and comparable sales growth and Global system-wide restaurant sales information is useful in analyzing our results since our franchisees pay royalties and marketing fund contributions that are based on a percentage of franchise sales. Comparable sales and Global system-wide restaurant sales results for restaurants operating outside of the United States are reported on a constant dollar basis, which excludes the impact of foreign currency translation. Franchise sales also generate commissary revenue in the United States and in certain international markets. Franchise restaurant and comparable sales growth information is also useful for comparison to industry trends and evaluating the strength of our brand. Management believes the presentation of franchise restaurant sales growth, excluding the impact of foreign currency, provides investors with useful information regarding underlying sales trends and the impact of new unit growth without being impacted by swings in the external factor of foreign currency. Franchise restaurant sales are not included in the company’s revenues.

Reconciliation of Non-GAAP Financial Measures

The table below reconciles our GAAP financial results to our adjusted financial results, which are non-GAAP measures. The non-GAAP adjusted results shown below and within this press release, which exclude the items in the table below (collectively defined as “Special items”), should not be construed as a substitute for or a better indicator of the company’s performance than the company’s GAAP results. Management believes presenting certain financial information excluding the Special items is important for purposes of comparison to current year results. In addition, management uses these metrics to evaluate the company’s underlying operating performance and to analyze trends.
