- (b) Represents the change in year-over-year sales for the same base of restaurants for the same fiscal periods. Comparable sales results for restaurants operating outside of the United States are reported on a constant dollar basis, which excludes the impact of foreign currency conversion.

Management believes global restaurant and comparable sales growth information, as defined in the table above, is useful in analyzing our results since our franchisees pay royalties that are based on a percentage of franchise sales. Franchise sales generate commissary revenue in the United States and in certain international markets. Global restaurant and comparable sales growth information is also useful in analyzing industry trends and the strength of our brand. Franchise restaurant sales are not included in company revenues.

Revenue and Operating Highlights

All revenues and operating highlights below are compared to the same period of the prior year, unless otherwise noted.

Revenues

Consolidated revenues increased \$30.6 million, or 9.6%, for the second quarter of 2013 and increased \$54.9 million, or 8.5%, for the six months ended June 30, 2013. The increases in revenues were primarily due to the following:

- Domestic company-owned restaurant sales increased \$11.6 million, or 8.1%, and \$25.7 million, or 8.9%, for the three and six months, respectively, primarily due to increases in comparable sales of 6.0% and 4.9% and the net acquisition of 50 restaurants in the Denver and Minneapolis markets from a franchisee in the second guarter of 2012.
- North America franchise royalty revenue increased \$1.1 million, or 5.9%, and \$1.3 million, or 3.4%, for the three and six months, respectively, primarily due to increases in comparable sales of 2.6% and 1.7% and increases in net franchise units over the prior year. These increases were partially offset by reduced royalties attributable to the company's net acquisition of the 50 restaurants noted above.
- Domestic commissary sales increased \$13.4 million, or 10.6%, and \$19.7 million, or 7.5%, for the three and six months, respectively, primarily due to increases in sales volumes as well as increases in the prices of commodities.
- International revenues increased \$3.8 million, or 21.6%, and \$6.8 million, or 19.9%, for the three and six months, respectively, primarily due to increases in the number of restaurants and increases in comparable sales of 6.8% and 7.5%, calculated on a constant dollar basis.

(a) Income before income taxes and other financial measures excluding the Incentive Contribution are non-GAAP financial measures. See Marketing Incentive Contribution table below for additional details and a reconciliation to our GAAP financial measures.

Second quarter 2013 income before income taxes increased approximately \$3.1 million, or 13.5%, excluding the Incentive Contribution, primarily due to the following:

- Domestic commissaries increased primarily due to the increase in net restaurants and comparable sales as well as a higher gross margin. We manage commissary results on a full year basis and anticipate the 2013 full year margin will approximate 2012.
- North America franchising increased primarily due to the increase in net restaurants and comparable sales.
- International increased primarily due to the increase in net restaurants and comparable sales results and an improvement in our United Kingdom results.
- All others increased due to an improvement in our online operating results due to higher online sales volumes.

These increases were partially offset by a decrease in income before income taxes at our domestic company-owned restaurants primarily due to higher commodity costs, somewhat offset by incremental profits associated with higher comparable sales of 6.0%.

The increase in income before income taxes for the six months ended June 30, 2013 of \$1.9 million, or 3.6%, excluding the Incentive Contribution, was primarily due to the same reasons noted above.

The effective income tax rates were 32.2% and 32.6% for the three and six months ended June 30, 2013, representing decreases of 1.9% and 1.2% from the prior year rates. The lower tax rates were due to the settlement or resolution of specific state issues in 2013. Additionally, the rate for the six months ended June 30, 2013 reflected the reinstatement of certain 2012 tax credits under the American Taxpayer Relief Act of 2012.

The company's free cash flow, a non-GAAP financial measure, for the first six months of 2013 and 2012 was as follows (in thousands):

		Six Months Ended						
	June 30, 2013			June 24, 2012				
Net cash provided by operating activities (a) Purchase of property and equipment (b)	\$	47,232 (25.493)	\$	65,162 (15,046)				
Free cash flow	\$	21,739	\$	50,116				

- (a) The decrease of approximately \$17.9 million was primarily due to unfavorable changes in working capital, including the timing of income tax and other payments, partially offset by an increase in net income.
- (b) The increased purchases of property and equipment primarily relate to expenditures on equipment for the New Jersey dough production as well as technology investments.

We define free cash flow as net cash provided by operating activities (from the consolidated statements of cash flows) less the purchase of property and equipment. We view free cash flow as an important measure because it is a factor that management

uses in determining the amount of cash available for discretionary investment. Free cash flow is not a term defined by GAAP and as a result our measure of free cash flow might not be comparable to similarly titled measures used by other companies. Free cash flow should not be construed as a substitute for or a better indicator of the company's performance than the company's GAAP measures.

See the Management's Discussion and Analysis of Financial Condition and Results of Operations section of our Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission for additional information concerning our operating results and cash flow for the three- and six-month periods ended June 30, 2013.

(a) As previously disclosed, in connection with a 2012 multi-year supplier agreement, the Company received a \$5.0 million

supplier marketing payment in the first quarter of 2012. The Company is recognizing the supplier marketing payment evenly as income over the five-year term of the agreement (\$250,000 per quarter). In 2012, the Company contributed the supplier marketing payment to the Papa John's Marketing Fund ("PJMF"), an unconsolidated, non-profit corporation, for the benefit of domestic restaurants. The Company's contribution to PJMF was fully expensed in the first quarter of 2012. PJMF elected to distribute the \$5.0 million supplier marketing payment to the domestic system as advertising credits in the first quarter of 2012. Our domestic company-owned restaurants' portion resulted in an increase in income before income taxes of approximately \$1.0 million in the first quarter of 2012. These transactions together are referred to as the "Incentive Contribution."

The results shown in the table above and elsewhere in this press release, which exclude the Incentive Contribution, are not measures defined by accounting principles generally accepted in the United States ("GAAP"). These non-GAAP measures should not be construed as a substitute for or a better indicator of the company's performance than the company's GAAP results. Management believes presenting the financial information excluding the impact of the Incentive Contribution is important for purposes of comparison to prior year results. In addition, management uses these non-GAAP measures to allocate resources, and analyze trends and underlying operating performance. Annual cash bonuses, and certain long-term incentive programs for various levels of management, were based on financial measures that excluded the Incentive Contribution.

Share Repurchase Activity

The Company's Board of Directors approved a \$25 million increase in the amount of common stock that may be purchased under the Company's share repurchase program through March 30, 2014. Approximately \$80.1 million remains available under the Company's share repurchase program as of August 2, 2013.

The following table reflects our repurchases for the three and six months ended June 30, 2013 and subsequent repurchases through August 2, 2013 (in thousands):

Period	Number of Shares	Cost
Three Months Ended June 30, 2013	429	\$26,684
Six Months Ended June 30, 2013	978	\$58,806
July 1, 2013 through August 2, 2013	23	\$ 1,503

There were 22.3 million and 22.5 million diluted weighted average shares outstanding for the three and six months ended June 30, 2013, representing decreases of 7.7% and 7.1% over the prior year comparable periods. Diluted earnings per share increased \$0.06 and \$0.12 for the three and six months ended June 30, 2013 due to the reduction in shares outstanding resulting from the share repurchase program. Approximately 21.6 million actual shares of the company's common stock were outstanding as of June 30, 2013.

Quarterly Regular Dividend Announced

The company announced that its Board of Directors approved the initiation of quarterly cash dividends to its shareholders. A quarterly dividend of \$0.25 per common share will be paid on September 20, 2013 to shareholders of record as of the close of business on September 6, 2013. This is the first cash dividend paid to shareholders in the company's history. While future dividends will be subject to Board declaration, the company is initially targeting a dividend payout of \$0.25 per quarter.

2013 Guidance Update

The company updated its 2013 guidance as follows:

Updated Guidance Previous Guidance

Diluted earnings per share \$2.92 to \$3.00 \$2.90 to \$3.00

Capital expenditures \$50 to \$55 million \$55 to \$60 million
